Introduction

The Compliance Record Review Document is based on the requirements of the Individuals with Disabilities Education Act (IDEA) and *Kentucky Administrative Regulations for Special Education Programs* (KARs). The Division of Learning Services (DLS) has wide-ranging reasons for revising this document. They include:

- promoting a consistent standard for districts to use during compliance reviews of student due process folders
- developing a professional learning tool for compliance monitoring
- having a data collection document to accurately collect information required for KDE's federal State Performance Plan and Annual Performance Report (SPP/APR)
- establishing a consistent tool for use during the DLS consolidated monitoring process

The intent is to ensure not only compliance with the IDEA requirements, but also to facilitate results-driven accountability (RDA) to improve student outcomes. For further explanation of the RDA framework, click here.

For more information on documenting requirements, see the <u>Infinite Campus Student Information System</u> for Special Education Data Standards.

Directions for Review of Records

In order to yield accurate information, student records must be selected <u>randomly</u>. Random means records are not preselected. Selecting the record of every third, fifth or tenth student from the district's current special education enrollment is one means of random selection. Random also means that records are selected from a variety of schools, teachers, case managers and categories of disability. For assistance in obtaining true random numbers, visit <u>Random.org</u>. The web site contains a true random number generator.

For Indicators 11, 12 and 13, at least 10% of the district's special education population related to the indicator must be selected for the review to be valid. For more information on the State Performance Plan (SPP) indicators, click here.

A minimum of 10 files must be reviewed. If the district has 10 or fewer students that are covered by the indicator, all student records for that item must be reviewed. For example, if the district has eight students referred to its preschool program from First Steps, all eight records must be reviewed. Large districts are not required to review more than 50 records.

For Indicator 11, at least 10% of students evaluated during the current year must be chosen at random and their records reviewed. This includes both students determined to be eligible for specially designed instruction and those found not eligible for special education.

Correction of Noncompliance

Violations of IDEA that can be corrected

During the record review process, districts may find items in student records that are violations of IDEA. Some of these violations may be corrected, depending on the nature of the violation.

In most cases, it will be necessary to convene an ARC to correct the violation. If the ARC convenes to correct the violation, the ARC's documentation must reflect authentic, appropriate processes and corrections.

Only Indicator 13 records can be corrected prior to submission of the data to the KDE. If the record is corrected prior to submission to KDE, the record is considered to be in compliance.

Examples of violations that may be corrected prior to KDE submission include:

- failure to document postsecondary goals in the IEP (#49a)
- failure to document transition services in the IEP (#49b)
- failure to invite outside agencies (with prior consent) to the ARC meeting to discuss transition (#49c)
- failure to document the student's multi-year course of study (#49e)
- failure to link annual goals to related postsecondary goals (#49f)
- failure to document evidence of transition assessment (#49g)

Violations of IDEA that are reported as noncompliance

Some violations of IDEA identified during the district's record review cannot be corrected in individual student records due to the nature of the violation. This includes Indicators 11, 12 and parts of Indicator 13, as specified below:

- not obtaining parent consent prior to inviting outside agencies to the ARC meeting (#49d)
- not inviting the student to the ARC meeting (#49h)
- missing the timeline for updating postsecondary goals annually (#49i)
- not having transition requirements in the IEP by the student's 16th birthday (#50)
- missing the timeline for initial evaluation (#53)
- missing the timeline for annual review (#32)
- missing the timeline for an IEP being in place by the third birthday for children transitioning from First Steps to preschool (#31b)

Though these violations cannot be corrected, the district must remedy the noncompliance in the individual student's record. For example, failure to meet the timeline for an IEP in place by the child's third birthday cannot be corrected; however, it can be *remedied* for that student by ensuring an IEP is in place, even though late.

If the student is no longer under the district's jurisdiction, individual noncompliance cannot be corrected.

Violations found in the due process files of <u>two or more students</u> in a district are deemed systemic. Documentation of systemic correction is required in addition to individual correction of noncompliance, according to <u>OSEP Memorandum 09-02</u>. In the case of a systemic violation, the KDE randomly selects student folders from the district. The KDE then verifies whether the record review item in question for *all* folders randomly reviewed is in compliance. If the item is correct for all student folders, the KDE has ensured systemic correction has occurred, pursuant to <u>OSEP Memorandum 09-02</u>.
